

- * Sample Business Requirement Document Template.
- * Problem: Caste plays a major role in Indian agriculture, and as a result, farmers there must overcome numerous obstacles in addition to nightly current. Since no one is available to assist them in the event that something goes wrong when operating the water pump, an application that can be accessed from a mobile device should be developed. Within the application, a timer is set to activate and deactivate the water pump at specific intervals.

1) executive Summary Snapshot.

- Research has shown that we need to develop an application or website for farmer
- This research data indicates that there are so many farmers need automatical working water pump
- The scope of the proposed project is in a large number in villages.
- The security of farmers will increase.

2> Project description.

- 1) While we can create or make this application for all
- 2) The goal of making an application for all district presents the following challenges such as we need to take data of the farmer helps or their information in which they are good application.

3> Project scope

- * Project special goals - to help all the working farmers, make their life easy.
- * Task :- we should make a farmer user application which all people can use without any difficulty.
- * costs :- approximately we need 15,000 for make single app, in which need to pay our team-member, there are some legal fees and taxes also associated and our companies ultimate goal is to make profit so we will need to look on that also.

- Deadlines - we need to give some deadlines by discussing with team member in which we will give our final Product Application. Such as, we will provide you app in 11 month.
